

# Reduce your sourcing costs by 20 to 60%!

## YOUR CHALLENGE

When managing clinical trials, one of the most important elements on which pharma companies must focus is **Comparator Sourcing**. Scarce resources, high costs, long sourcing lead time and short shelf-lives can make it hard to find a cost-effective sourcing strategy.

## OUR SOLUTION

Combining our simulation software, the **N-SIDE Supply App**, and our expertise, we optimize all levels of the supply chain and provide an **optimal sourcing and packaging strategy**, while ensuring a **100% patient service level at all times**.

At N-SIDE, our expert team is dedicated and passionate about clinical trial supply optimization and waste reduction.

- › Quantify the **minimum waste level** while still **avoiding any patient risk**, by considering all aspects of the clinical trial supply chain: **long sourcing lead-times, short remaining shelf life, limited availability**, etc.
- › Identify the drivers of drug waste and mitigate them to reduce waste by **20 to 60%**
- › Proactively **anticipate comparators demand**: no more firefighting!
