

N-SIDE Connect: Innovation in Clinical Supplies

Agenda excerpt - Spring 2024

PRESENTATIONS

- Navigating digitalization in clinical supplies: architecture, people and process good practices
- Enabling strategic collaboration across departments for supply chain success
- Enhancing clinical supply chain performance - processes, metrics, good practices and success story
- Study design specialist: An impactful role to reduce waste and cost of supply
- The impact of quantifying decisions: Illustration with digital labeling
- Adventures in drug pooling
- N-SIDE vision & positioning - The future of clinical trial supply systems & performance
- An optimization ecosystem for end-to-end (manufacturing, supply, demand) performance

BUSINESS CASES

- Driving cost savings through comparator sourcing optimization
- Key lessons from lot pooling initiatives and experience sharing
- A retrospective analysis: Looking back at 6 years of collaboration
- The impact of quantifying decisions: Illustration with digital labeling
- Managing flexibility in production planning: Perspective from a growing biotech
- Sustainability: Roadmap to zero emissions and how you could do it as well

WORKSHOPS

- AI in clinical supply chain
- The future of forecasting, planning & CTS systems
- Industry trends, and how they affect clinical supply
- N-SIDE Supply App power users workshop - exchange of good practices
- N-SIDE Prediction App users workshop - exchange of good practices
- Strategic workshop on collaboration across departments

PANEL

- Navigating digitalization in clinical supplies: architecture, people and process good practices
